ELMO BOARD CASE STUDY

Kadoma City Transforms Education

OVERVIEW

Kadoma City has embraced ELMO Products, including the ELMO Board, to modernize classrooms and create interactive learning environments. By adopting these digital tools, the city aims to foster student engagement, streamline lesson delivery, and strengthen teacher-student business collaboration in education.

CHALLENGES

Traditional classrooms relied heavily on chalkboards, printed materials, and static teaching methods. Teachers struggled to keep students engaged, while sharing digital resources and collaborating on assignments remained difficult. The lack of interactive tools limited both creativity and efficiency in learning.

SOLUTION

Kadoma City introduced the ELMO Board as part of a broader digital education initiative. This interactive display allows teachers to present multimedia content, annotate directly on screen, and encourage student participation. Alongside other ELMO Products, the solution supports hybrid learning, group projects, and real-time feedback.

SOLUTIONS IMPLEMENTED

ELMO Boards were installed across multiple classrooms and paired with student tablets connected through ELMO Collaboration. Teachers can now share lesson content instantly, invite students to annotate or present ideas, and save digital notes for review. Training sessions ensured that educators could quickly adopt and integrate the system into daily teaching.

OUTCOMES

- **Enhanced engagement:** Students interact with lessons directly on the ELMO Board, making classes more dynamic and collaborative.
- **Efficiency gains:** Digital notes and shared resources reduce reliance on printed materials and save preparation time.
- **Future-ready learning:** Kadoma's classrooms are now equipped with modern tools that support active learning and flexible collaboration.

CUSTOMER PERSPECTIVE

A Kadoma City education official commented: "*The ELMO Board has completely changed our classrooms. Lessons are more interactive, and students participate actively. This ELMO Product supports not only teaching efficiency but also prepares our children for a digital future.*"
